hours

I am a 11th grade student who has interests in reading , painting, and teaching . I had two reasons for seeking out this community service, the first one being I love teaching and the second one is that I love the subject English.

I was assigned the position as the leader of the team by our instructor and my team consisted of 7 students. As the leader of the team I had a lot of responsibilities : briefing new students about their duties, guiding them in subjects of teaching , creating learning material etc.

I enjoyed meeting the students from Bihar and teaching them was a lot of fun. Due to this it was a fun and enjoyable experience.

Learning Outcome

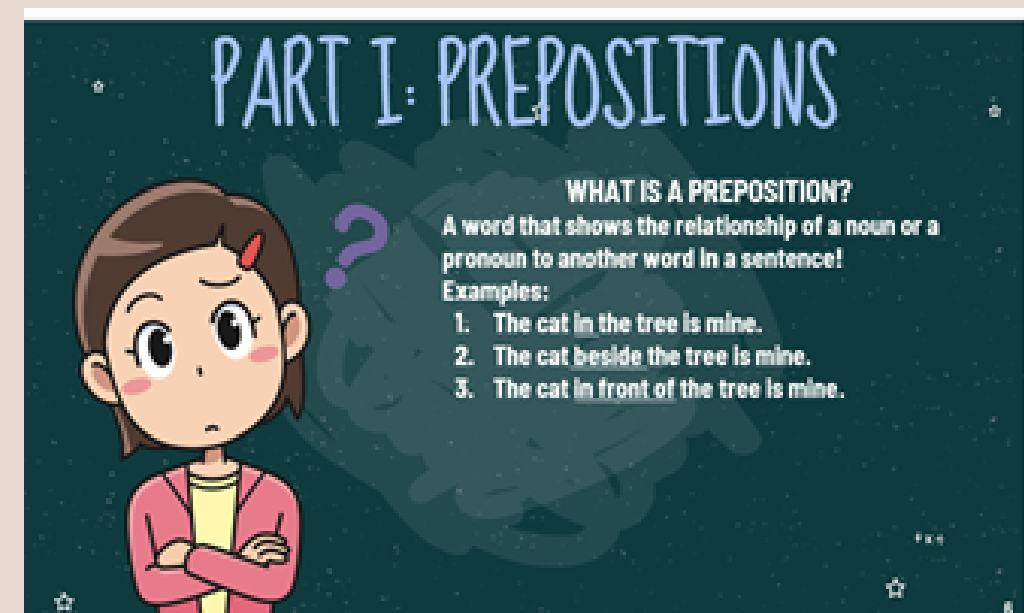

I will most definitely be considering teaching in my career options. I felt like an actual teacher and personally I made two new friends.

I would recommend assigning one teacher to all types of community service so that the students have somebody to help and guide them as most people I met were new to this whole community service experience.

As I mentioned earlier English is my favourite subject , hence it helped the most during my community service.

Overall I liked and had lots of fun and learning experience during this internship . One tip I would like to give to future students would be to choose a face to face internship/ community service if the situation allows them to as they give you one-on- one interation and are much more educational.
